Structure

1. Intro
2. People and Projects
3. Where does the Project end
4. Identifying the SH and grouping
5. Commiunication
6. Main issues
7. Thin line between Stake holders and Team building

Stakeholder identification

stakeholder Analysis

ID	SH	Position	Role in Project	Power (l,h)	Attitude (n,p)	Interest	Strategy	Partner
2	Mountaineer in rescue	Service provider	Spectator	l	p	Save, not involved, exact information	Monitor: No info in advance Someone gives information in emergency with details	Friend

Primary stakeholders

- directly affected by the work

Secondary stakeholders

- indirectly affected by the work

Key stakeholders

- strong influence over the work
- interest in its success

Identifying Stakeholders in Stability and Crisis

Include experts in stake holder and
risk management

ANDRA HÄNIG / 24.5.2023

Feelings - Needs and Values

Feelings - Needs and Values

Feelings - Needs and Values

It is not a head but also a heart topic to deal with SH.

Understand feelings.
Take needs seriously

“Determine their motivation.”

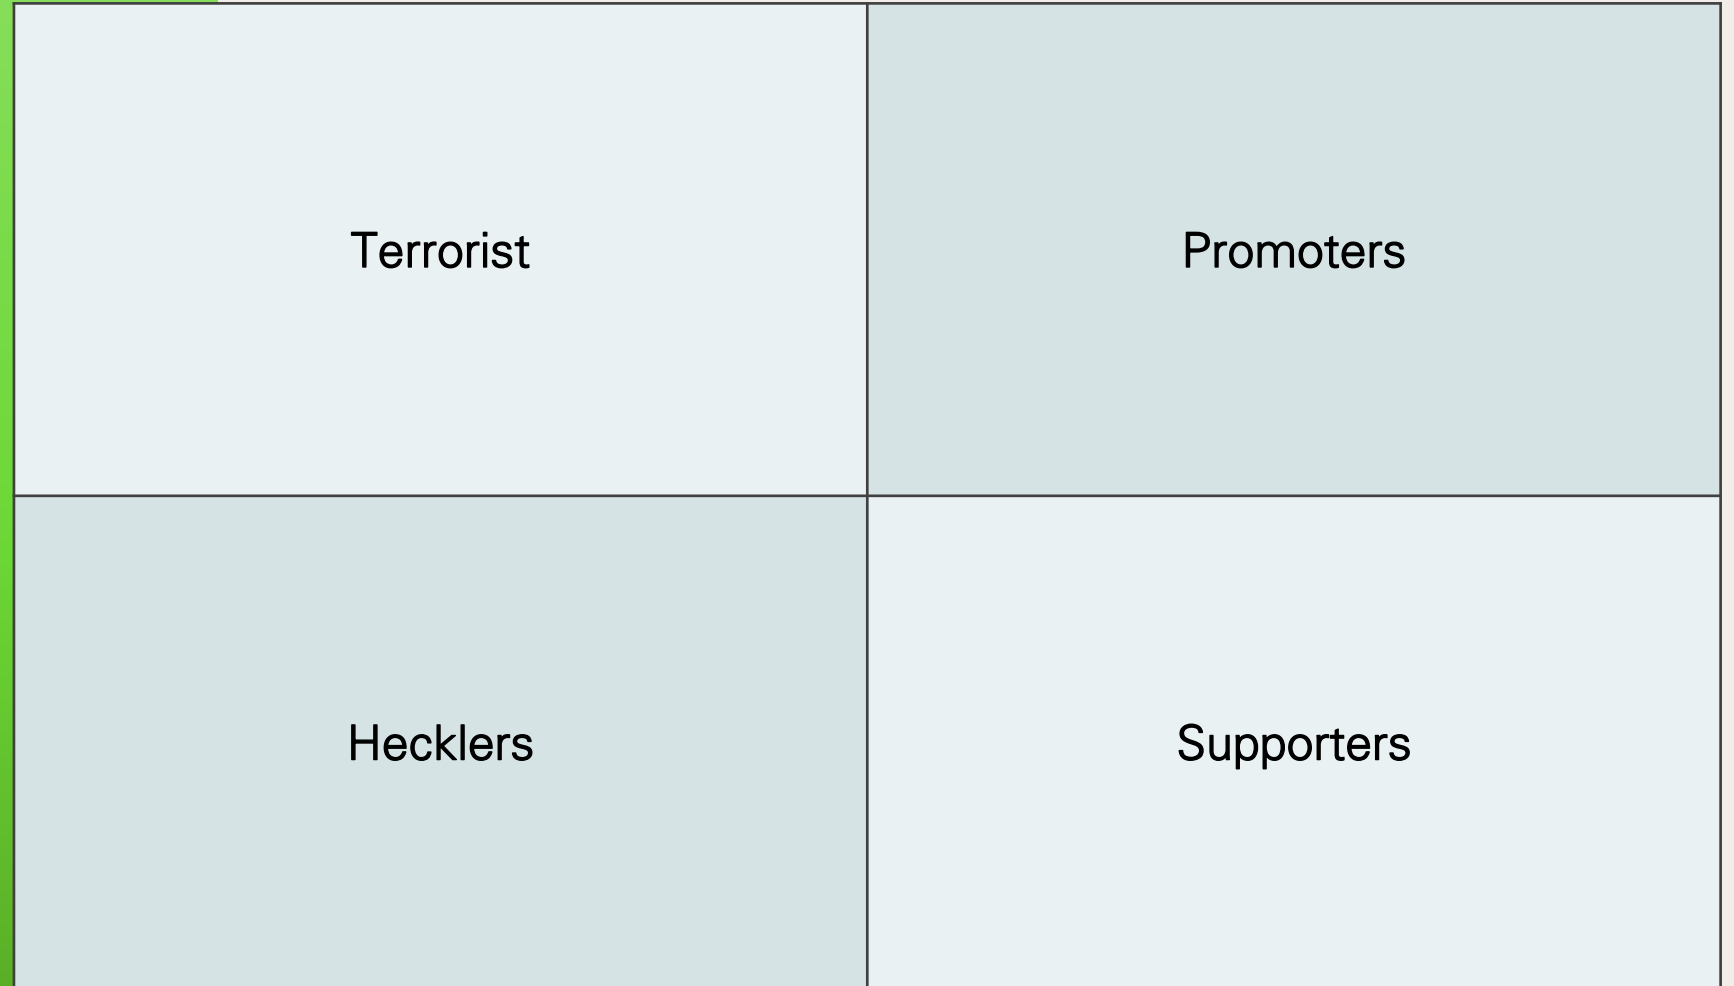

- What are their most pressing business needs?
- What information or details do they want or need?
- Who influences them?
- Who do they influence?
- What are they responsible for?

New mindset
“Don’t be afraid of fear”

Stakeholder Matrix

The heart of Project Management

Timeline of Stakeholder Management

Stakeholder Management Process

Vision

Believe in your vision

Effective communication

Communication is multidirectional.
Find matches in communication.

Listen to what they say.
Positions may change

Stakeholder management

Difficulties

- Identification is hard
- Wrong Communication methods
- Wrong power/influence - strategy
- Incorrect stakeholders groups.

Ignore

- Risks stakeholders relation
- Goal stakeholder relation
- Stakeholders influencing each other
- Misunderstand needs

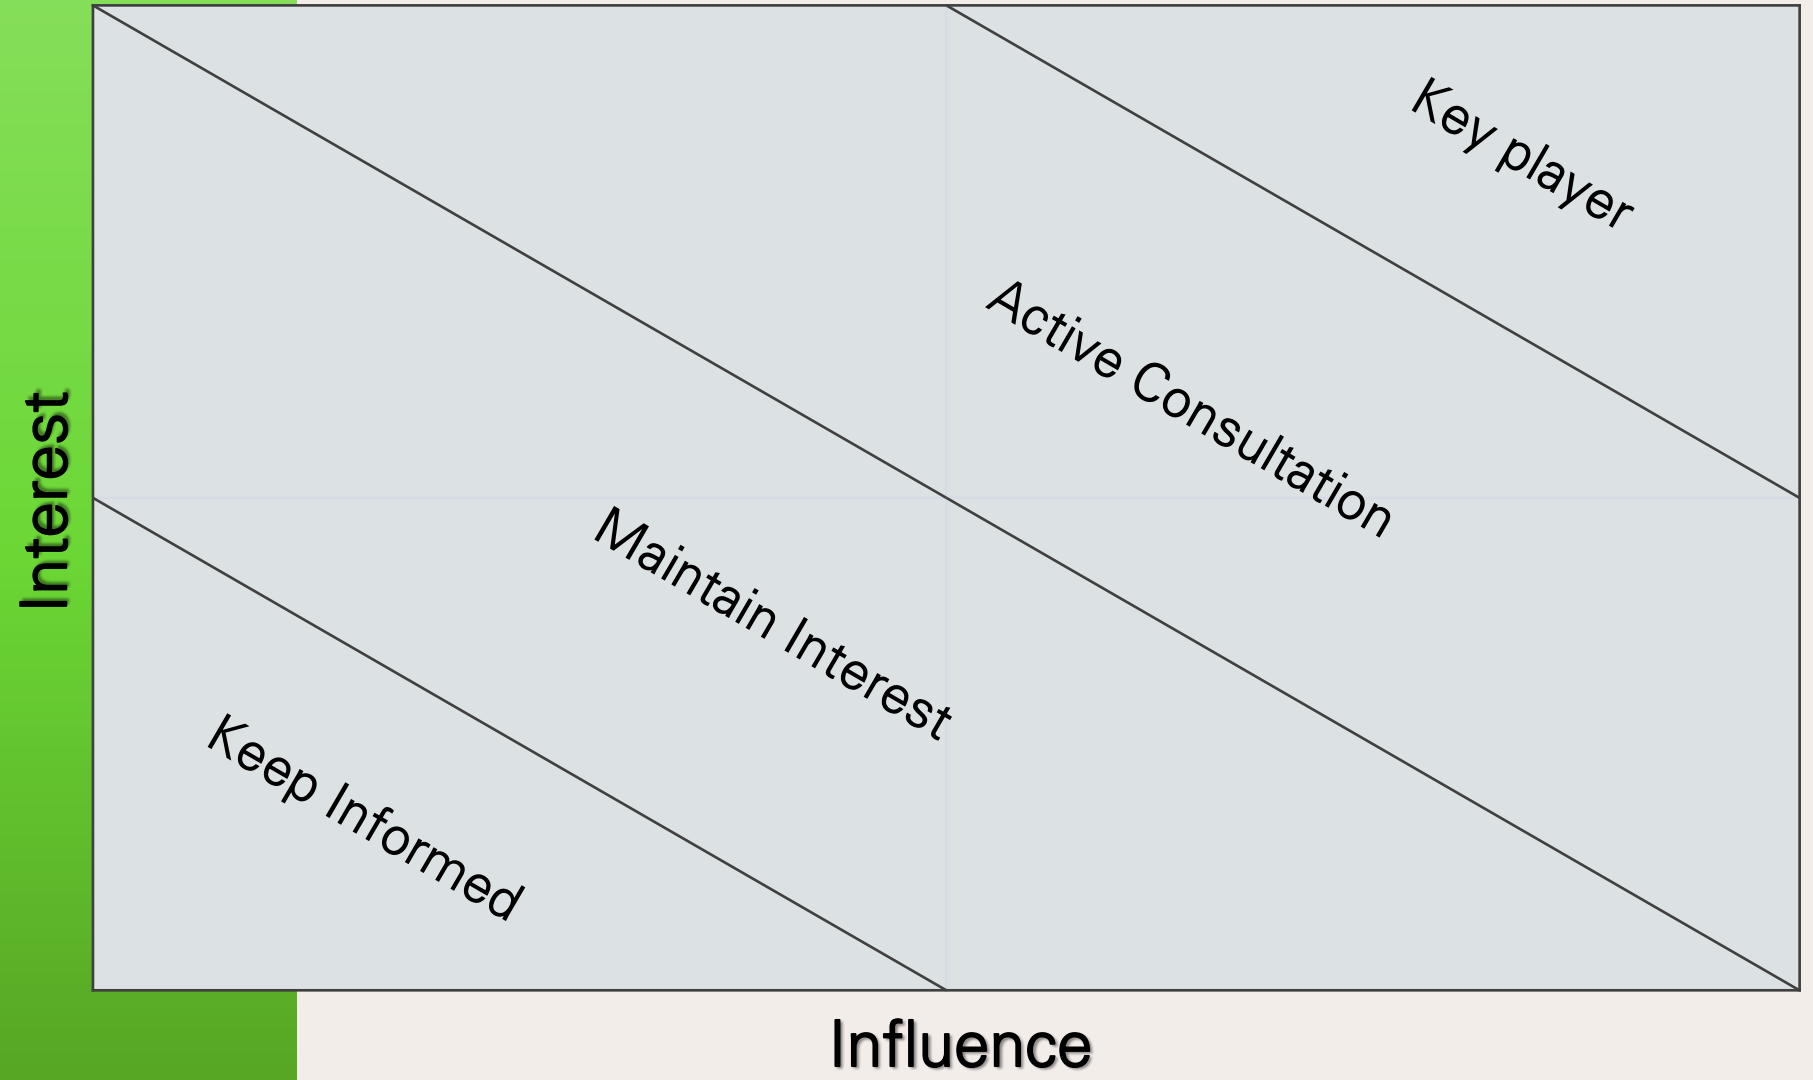

Projects change the live or others

Possible
Don't be afraid of fear!
